## Notes:

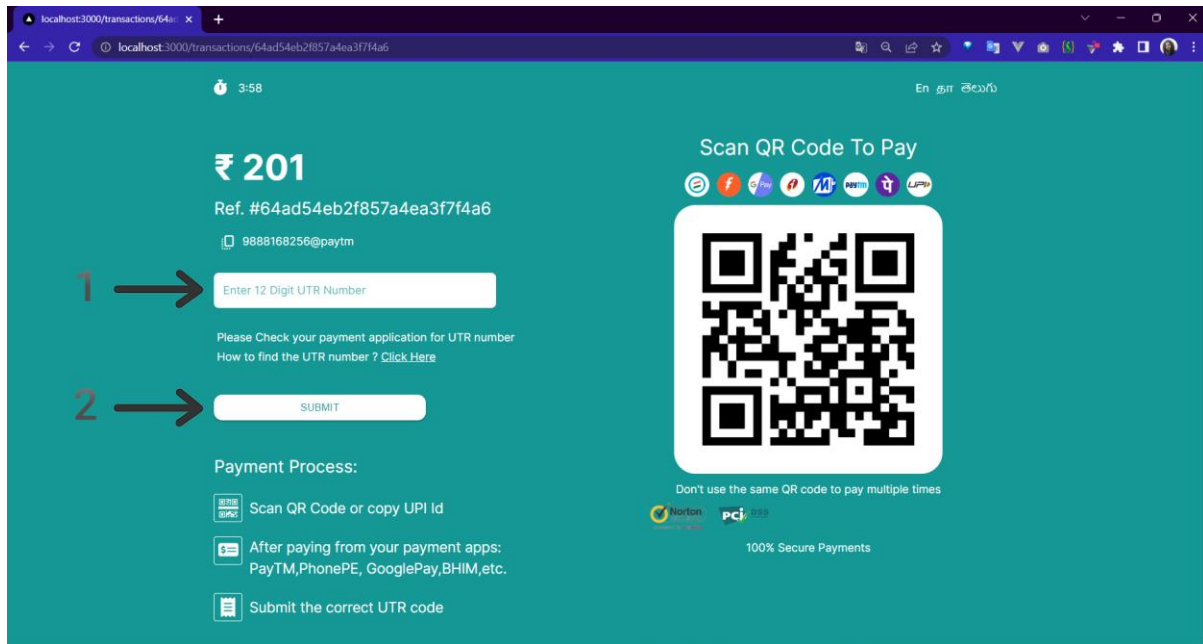

- RelateTo is user **\_id** got it from login response
- Our system will send request to callback\_url as POST request when the status updated

## 3- Redirect Client to transaction page

You will redirect client to redirect page after create transaction will get **\_id** from its response and redirect client to [https://pay.payz365.com/transactions/{\\_id}](https://pay.payz365.com/transactions/{_id})

Replace **\_id** by transaction **\_id** like

<https://pay.payz365.com/transactions/64ad3564b564b384ce639cfb>

#### 4- Receive transaction update on your call back URL that you provide us

#### Status flow
